## BERTONI 1949

### Nomads Land - Fall Winter 2016

The American Dream theme remains at the core of Bertoni 1949 collection.

This season the brand celebrates the most original, free-spirited, nomadic attitude of the American culture, rooted in the exchange and integration of different traditions.

This reflects in an eclectic collection, where the brand's signature upscale craftsmanship is enriched by precious embellishments and techniques. Patchwork of multicolor materials and studs covered with leather give a charming twist to the luxury bags. Hand-painted bandana-inspired paisley motifs enhance the collection's artisanal appeal infused with an artistic approach. Everything is worked in a color palette spanning from rich earth tones to vivid red, blue and yellow shades.

An evolution of the Doriana top handle style, Bertoni 1949 introduced a new graphic flap bag, the Dafne top handle worked in French calf, as well as in a patchwork of materials and in printed leather with a wood-like effect.

Last season's Gemma clutch with a precious closure is now transformed in a functional cross-body, while Anjia day handbag, featuring a top zipper and a detachable strap, is crafted from super soft leather.

Bertoni 1949 continues to expand its Heritage Collection of luxurious trunks and travel pieces, which include jewelry and beauty cases, as well as hat boxes, presented in parchment with contrasting trim.
